Weddings

SNYDER-DICKAU.
Zion Evangelical Church was the scene of a pretty wedding on Tuesday, April 6, when Esther Diana, youngest daughter of Mr. and Mrs. Charles Dickau became the bride of John Brado Snyder, son of Mr. W. H. Snyder, both of Didsbury.
The church was beautifully decorated with plants and pink and white streamers, making a splendid setting for the ceremony performed by Rev. A. M. Amacher.

The bride entered the church on the arm of her father, to the strains of Lohengrin's wedding march, played by Mrs. A. Amacher.

The bride looked lovely in a floor length gown of white sheer. Her veil of embroidered net, was held in place by a coronet of orange blossoms, worn by her mother thirty-five years ago. She carried a bouquet of pink roses. Her only ornament was a gold locket, a gift of the groom.

The bride was attended by her sister, Mrs. Jake Schellenberg, as Matron of honor, who chose a slip-length blue sheer gown with a blue tulle and a corsage of pink roses.

Miss Ruby Tuggle, as bridesmaid, was attired in a slipper length pink sheer gown with a pink tulle and a corsage of pink roses. Both attendants wore matching roses in their hair.

L. A. C. Charles Snyder, R. C. A. F. brother of the groom, acted as best man, and Messrs. Jake Schellenberg

Farewell Party.

On Tuesday evening, March 30, about thirty friends and neighbours called at the home of Mr. and Mrs. Henry Hooper to bid them farewell as they are leaving shortly to take up residence in their new home at Nanaimo, B.C. The evening was spent in games and contests, Rev. Amacher sang a solo, Mr. Wm. Hooper also singing.

On behalf of the Jutland Sunday School, Rev. Amacher presented Mr. and Mrs. Hooper with an electric toaster, and on behalf of the W.C.T.U., Miss Myrtle Jackson presented Mrs. Hooper with a table cloth.

Mr. and Mrs. Hooper will be greatly missed in the community, especially in church and Red Cross work, where Mrs. Hooper has been an active helper. We wish you much happiness in your new home, Mr. and Mrs. Hooper.

"Jungle Book", Starring Sabu, the Indian boy actor, at the Didsbury Theatre this week-end. All in grand Technicolor, here is Rudyard Kipling's famous Jungle story of thrills, suspense and humour in the wild animal kingdom.

and Elvern Swain were ushers.

During the signing of the register, Mrs. B. Dickau, Oide, aunt of the bride, sang "Bacause". The bridal couple left the church to the strains of Mendelssohn's march.

Mrs. C. Dickau, mother of the bride, chose for the occasion, a printed sheer dress and wore a corsage of talliesman roses.

A reception to about sixty guests was held at the bride's home. The bride's table was centred with a three tiered wedding cake and pink and white streamers prettily decorated the room.

The luncheon attendants were the Messrs. W. Lina Llesemer, Edith Pratt, John Llesemer, Myrtle Schmidt, Hazel McCaig and Elizabeth Hohn. Mrs. J. L. Tuggle poured tea, and Mrs. E. Llesemer cut the ices.

For travelling the bride chose a copen blue dress with blue accessories. The happy couple left for a short honeymoon at Edmonton and on their return will reside on the groom's farm east of Didsbury.

Red Cross Drive

With one or two more small districts yet to be heard from, the amount subscribed in the Red Cross Drive in this district has reached \$4427.91.

Local Breeders Purchase Bulls at Calgary

Several local cattlemen purchased bulls at the Calgary Bull Sale last week. Among the purchasers from this district were:

The Robertsons and Ed Klink purchased a Hereford bull from the Francis Farms of Carstairs, the price paid being \$600.00.

Hughes Bros, purchased a Hereford from the McIntyre Ranch at \$750.00.

Norman Tuggle and Herman Dageforde bought an Aberdeen Angus from Roy Bellhorne of Wetaskiwin, at \$115.00.

Roy McNaughton purchased an Aberdeen Angus from Matthews, of Calgary, at \$305.00.

Bobby Hughes, with a calf in the baby feed class at the Calgary Spring Sale last week, won fifty place and sold for 20c per pound. The calf weighed 810 pounds.

Mt. View Co-Operative Has \$4,845.00 Surplus

The annual meeting of Mountain View Co-Operative Livestock Marketing Association Ltd., was held Saturday last at Olds with only a fair attendance of members, owing to the bad state of roads.

The financial statement showed a gross turn over of \$1,146,494.00 from a volume of 46,219 hogs, 1,118 cattle and 871 sheep.

From the surplus of \$4,845.00 accruing from this business, the meeting authorized the payment of the usual patronage dividend of 15c per hog, and in addition voted the sum of \$250.00 to the Red Cross and the investment of \$500.00 in the new Victory Loan.

Boys Acknowledge Receiving Cigarettes

Below is a list boys, overseas, who have acknowledged the receipt of cigarettes from the Didsbury and District Tobacco Fund, during the past four months. From a shipment of thirty three dollars, or 9,900 cigarettes, sent in September, replies have been received from thirty of the boys, which is a splendid percentage. The letters acknowledging the December shipment of \$84.00, or 16,200 cigarettes, are coming through this past month.

This fund is getting down to rock bottom, and the committee has decided to hold a dance, also sell tickets on six five-dollar War Savings Certificates, during the last week in April. Date to be announced in our next issue.

As you will recall, the I.O.D.E. had charge of this work previously, but it became rather heavy, so the Didsbury & District Tobacco Fund was organized. It comprises a representative from following organizations: I.O.D.E., Tanks, A.W.A.C. and Canadian Legion.

It is somewhat difficult to keep track of the boys in the forces from this district, as they are sent overseas. As the boys go over, relatives are asked to hand in their names and address to the secretary, Mrs. G. Durant, and they will be placed on the list to receive cigarettes.

Mr. and Mrs. Geo. Law and family, accompanied by Mr. and Mrs. Jack Law and family, and Miss Harriet Law, drove to Edmonton on Sunday to attend a family re-union at the home of Mr. Law's parents. Besides the father and mother, there were present George and Jack Law and families. Miss Harriet Law, Chastek Law of Winnipeg and Dr. Frank Law of Edmonton. Incidentally it was also Mr. George Law's birthday.

Notes From the West

The last meeting of the Elktion Willing Workers was held at the home of Mrs. W. Blain, but owing to the bad roads only a few were able to attend. Some quilting was done. The next meeting will be held at the home of Mrs. W. Banling on April 14.

AC Gordon Befus has been moved out from St. Thomas, Ont., and is now stationed at Yorkton, Sask.

Mrs. W. Tryonek and son, of Lethbridge, are visiting with her parents, Mr. and Mrs. J. Hoesgood.

Mr. and Mrs. P. Hoesgood visited with Mr. and Mrs. Ed. Parker on Sunday.

United Church Notes.

The minister will continue his series of Lenten sermons, and hopes to be able to get to Westcott and Westerdale again.

A congregational meeting will be held at the close of the Edna Jacques recital on Thursday, April 15, to consider the matter of the pastorate.

Be sure to hear Edna Jacques. Everyone who has heard her is delighted with her humor. There is not a dull moment.

Evangelical Church Notes

Dr. J. Banling, of Calgary, will have full charge of the services on Sunday. He will speak at the 10:30 a.m. service and at the 7:30 p.m. service. He will also be at Jutland at 2 p.m. We extend a cordial invitation to all to hear Dr. Banling.

St. Cyprian Church Notes.

Service will be held on Sunday afternoon at 3 o'clock.

The Senior Red Cross Tea Committee will hold a Sale and Tea in the basement of the Knox United Church, on Saturday, April 17. The ladies of this committee are asking anyone who can spare sugar or butter from their ration, to give it to the committee to be used in baking. Please leave it with Mrs. Hawkes or Mrs. J. L. Clarke.

In Nazi Germany

A FEW WEEKS AGO the German people observed the tenth anniversary of the founding of the National Socialist regime. As everyone knows, this unpropitious anniversary was marked by a powerful attack on Berlin by British and Canadian bombers, and by news of serious German defeats in Russia and Africa. The dismal and apologetic radio addresses arranged by leaders of the Nazi party, were interrupted by the crash of British bombs, and it appeared that the day could in no way have been called one of happy celebration by the German people. In his early years in office, Hitler assured his people that the policy of his party was not to involve the country in war, nor to conquer and annex other nations. Yet after ten years nearly 5,000,000 Germans have died on foreign battlefields in Hitler's wars of aggression, and many thousands are homeless because of air attacks.

Workers' Lot Has Declined

In connection with the progress of the German people under the Hitler regime, some very interesting facts and figures have recently been given out by the British Ministry of Information. The lot of the farmer has appeared to decline steadily in the past ten years. It is said that between 1922 and 1932 the number of men engaged in farm work decreased by one million, and the decline has continued since that time. Industrial workers have also had a difficult time. In 1933 all Trades Unions were abolished, their funds being seized and their leaders arrested. All workers' rights were also abolished, overtime work became general and the number of industrial accidents rose from 327,000 in 1932 to 1,760,000 in 1934.

Public Health Record Poor

Malnutrition is said to have increased greatly among German workers and there has been a decline in the standard of national health. In the past ten years, deaths from scarlet fever, infantile parotitis and other contagious diseases have risen by 200%; mortality among children between the ages of one and five has increased by 12%, and of children between five and ten by 25%. Under the republican system of government in Germany there was the medical doctor to every 1,300 people, but in 1941, there was only one doctor to every 15,000 people. These facts show clearly that living conditions under Nazi rule are far from happy for the common people, and they serve to remind us again of the things for which we are fighting. When we compare conditions here with those in Germany today, we see that we must at all costs make sure that it is our way of life which survives this war.

Proposed Motorcade Propaganda Programs

To Enable People To View The Majestic Scenery On Road To Alaska

Possibility of a "motorcade" over the new Alaska highway this summer to enable civilian motorists to view the majestic scenery of north, west Canada and Alaska, was announced at Calgary.

A report from Winnipeg stated a western committee was discussing plans for the "motorcade" in view of inquiries from all parts of U.S. and Canada from motorists who wish to travel over the new route.

Military authorities of course will have to give the "green light" before anything definite can be assured. "An agent of the war will have to be 'on sight' before a 'motorcade' is likely.

DEMAND EXCEEDS SUPPLY

Twice as many wedding rings are to be made in Britain during the next few months. Protocols about the shortage have been reaching the Board of Trade. An official said: "We even heard that in some cases the person conducting the wedding had to take off his ring and lend it to the bridegroom for the occasion."

Some folks aren't worrying about being short on sugar for their coffee. No coffee!

HORSE VACCINATION

Necessary For The Prevention Of Equine Encephalomyelitis

Although the history of equine encephalomyelitis is well known to many, it is well perhaps to review the matter and mention some of the more recent findings in connection with the disease. That stock raisers fully appreciate, not only the economic side, but the newer aspect, that pertaining to public health.

Sleeping sickness of horses in Saskatchewan was first recognized as such in 1935 when a fairly extensive outbreak occurred. In 1936, few cases appeared, but in 1937, a second and more extensive epidemic occurred, followed in 1938 by one that was as severe that some 15,000 horses were lost.

It was extremely difficult at first to control the disease since there was no suitable immunizing agent available. In 1938, however, Chick Enzyo vaccine was introduced, which we have found to be almost 100% effective, in fact it is quite safe to state that a horse properly vaccinated prior to an outbreak occurring will not contract the disease. In spite of this, however, the practice of preventive medicine, unfortunately the opportunity has not been grasped with the result that cases have developed annually, whereas the disease could perhaps have been completely controlled had vaccine been used regularly.

After the extensive outbreak of 1938, stock owners were greatly alarmed, and the result was that in the spring of 1939, some 450,000 horses were vaccinated in the Province of Saskatchewan alone. Whether or not this program had any bearing on the incidence of the disease that year, it is true that very few cases occurred, and those which did were confined to non-vaccinated animals. Because of the freedom from the disease in the Province, there was not the same keen interest in vaccination in the spring of 1940; therefore comparatively few animals were protected. Lack was again with us that year, and although isolated cases developed throughout the Province, there was nothing approaching an epidemic.

Because of comparative freedom from the disease for two years, many were of the opinion that further vaccination was unnecessary and very little was done in the spring of 1941. With amazing suddenness, however, an outbreak commenced in the middle of June, cases being recognized in quite distant parts of the Province at the same time. Since manufacturing concerns anticipated considerable savings, vaccination was not carried on hand early in the year, but when the outbreak occurred, most of this vaccine was used, and the disease was value. Owing to an extensive outbreak in the United States, American companies were unable to send further shipments of new vaccine and, because of this, there was an acute shortage throughout western Canada.

That as many horses as possible be protected, the Department of Veterinary Science at the University of Saskatchewan immediately travelled and distributed sufficient vaccine to keep the outbreak fairly well under control. This was accomplished with great deal of difficulty and much sacrifice on the part of the staff of the Department, who worked long hours throughout the season.

That such an unfortunate situation may not arise this year, stock owners should be advised to have their horses vaccinated early in the year, and not wait until an outbreak occurs. The loss by the death of one or two horses is certainly much greater than the necessary outlay for the protection of a fair sized herd or on for the purchase of a bottle of serum to treat one developed case.

In many instances last year, farmers waited until the disease actually appeared in their district, and only then it appeared in their stud, before taking any action. It should be realized that horses may yet be necessary for the carrying on of our agricultural pursuits; mechanical power may be extremely difficult to secure and the consumption of fuel may be further curtailed at any time. The farmer who depends entirely on truck and tractor power may be in a very precarious position and it seems to be economically sound to protect every available horse. Not only should work horses be vaccinated; young animals should be vaccinated as well, since they may be absolutely essential in the future to do work on farms, or to take the place of delivery trucks in cities, which very shortly may be off the road entirely.

During the years encephalomyelitis was common among horses in Saskatchewan, physicians reported an increasing number of cases of encephalitis in man, and the question arose as to whether or not there was any relationship between the two infections. In 1938, the year the disease was so prevalent in horses, some 40 cases were recognized in man and, during the following year, we isolated the equine virus from three human cases. Just prior to this discovery, workers in the United States also found that man was susceptible to the Equine 1329 virus. Although it was definitely shown that man could contract the horse disease, and that the disease could be actually died in Saskatchewan, little interest was taken in the matter until about 1939, when the most extensive human epidemic ever recorded occurred in the northern States, Manitoba outbreaks that. During the course of this outbreak, we were successful in isolating the virus or germ from two cases, and later proved from the fact that the entire outbreak was due to the same germ as equine encephalomyelitis. In Saskatchewan alone, 620 persons contracted the disease; eight per cent. of these died.

To state that horses were responsible for the human epidemic would be unwise because of our limited knowledge of how the human infection occurs. It is true, however, that the elimination of this disease in the horse, undoubtedly a virus reservoir when infected, appears to be sound practice, and this can only be done by vaccinating each year. No one can predict what may happen in the future in regard to human or equine outbreaks, but, if the behaviour of the horse disease is any criterion we must not neglect the human disease which will never recur.

There are a number of points in connection with the equine and the human outbreaks that are very similar indeed. For example when the equine disease first appeared in Saskatchewan, it undoubtedly travelled from the northern United States to Manitoba and then to the southern part of the Province. After several outbreaks it appeared that the virus had become acclimated to our Province and had lived over the winter months in the form of prepared outbreaks, but, if the behaviour of the horse disease is any criterion we must not neglect the human disease which will never recur.

Get your KELLOGG'S ALL-BRAN daily . . . drink plenty of water . . . and discover for yourself how easily your old "trouble" disappears. Get KELLOGG'S ALL-BRAN! Available in two convenient sizes at all grocers'. Made by Kellogg's in London, Canada.

It's no wonder, rather than calling the local "handy man" who through his clever methods may carry the disease from one form to another, the following procedure is suggested:

1. Secure a 10 cc hypodermic syringe equipped with two needles; this may be purchased at almost any local drug store. Immerse the syringe and needle in boiling water for twenty minutes before using them.
2. Clip and thoroughly cleanse with rubbing alcohol a small area of the horse's neck half way between the shoulder and the head.
3. Attach a needle to the syringe; insert it through the rubber cap on the bottle containing the vaccine serum, and draw the contents into the syringe.
4. With the left hand, hold out the skin of the neck, and with the right hand, introduce the needle beneath the skin and inject the vaccine.
5. Remove the needle; with clean gauze, saturated with rubbing alcohol, cleanse the point of injection, and the prepared area of the neck again.
6. After using the needle place it in the neck of a glass jar containing rubbing alcohol where it should remain until required again.
7. Blow the rubbing alcohol out of the needle before using it again; then insert the needle by (a) pulling the plunger of the syringe half way up, (b) attaching the needle, and (c) pulling the plunger down.
8. Be sure to handle the needle always by the base, not by the point, so as not to contaminate part of the needle.
9. Chick vaccine must be kept at ice box temperature (from 35 to 40 degrees F.) until preparations for using it are completed; it loses its effectiveness quickly when kept at higher temperatures.

It should be understood that the vaccine supply may be limited because of the fact that three sales of supply for Canada are made by the Lederle Company, New York; the Cutter Company, California; and the Department of Veterinary Science, University of Saskatchewan, Saskatoon. The Department of Veterinary Science has prepared considerable quantities and will continue to do so until the demand is taken care of. The vaccine may be bought at drug stores and other stores that handle drug supplies.

Was Quite Correct

But Be-Well Was Thinking Of Another Kind Of Adjust

The young recruit, a university graduate, was appearing before the army examination board.

The first "intelligence question" was: "What is an adjust?"

Came the reply: "An adjust is a large bird of uncouth appearance. It has an almost bald head, a tremendous capacity for eating and acts as a public scavenger. It can swallow a cat with ease."

The examining officer almost fainted.

Subsequent investigation, however, proved that the recruit was correct. The was an almost wordily word description of an adjust in the National and Everyman's encyclopaedia.

BACKACHE? Look out for Trouble With Your KIDNEYS

If your back aches or if you have distended, swollen kidneys, look out for trouble. This condition is a sure sign that your kidneys are not fully doing their job of filtering out poisons and wastes. When the kidneys stop, the body is in a state of toxic, putrid, and rheumatic pain may follow. Your kidneys need help—and there is a remedy, proven by years of use, known as GOLD MEDAL Backache Drops. These capsules contain the most powerful and effective kidney medicine known. They are packed in a convenient, easy-to-use, 40¢ package for your druggist.

MRS. J. H. LALIBERTE now wakes up feeling fine. She never has headaches, backaches, or indigestion any more. "Trade-cures" gave her the new health and pep of a healthy liver. Buck up your liver with "Trade-cures", Canada's Largest Selling Liver Tablets.

Interesting Tests Have Been Conducted In Connection With Canadian Army Mess Tin Ration

OTTAWA.—Field tests of the new Canadian Army Mess Tin Ration have demonstrated it is of a standard to maintain men at the peak of fighting efficiency during a ten day period of extreme exertion. This was announced by officials of the deputy quarter-master general's office, following a ten-day test. No hunger nor loss of weight developed, it was stated.

Following decision to provide a Canadian Army Mess Tin Ration and a Canadian Army Emergency Ration for issue to the Canadian Army in Canada and Newfoundland, the Department of National Defence standing committee on nutrition was asked to draw up a list of suitable and necessary items. In its preparation, the committee was instructed to produce plans for a mess tin ration on which a soldier could subsist for periods up to ten days. During this period it was explained that men would engage in manoeuvres of strain approximating that of actual combat and still maintain a peak of fighting efficiency. Both rations now are being assembled for general issuance.

Personnel taking part in the tests were divided into groups. Each comprised one officer, one non-commissioned officer and 18 men. All were chosen from seasoned infantry battalions. The men, all between the ages of 21 and 30, were sound mentally and physically. Each had demonstrated in two years or more of training that he was well disciplined, of good morale, and of equable temperament. Regiments from which they had been chosen had been on active service for at least two and a half years and were fully trained.

To facilitate selection of personnel and to gauge and record the effect of severe physical exertion of men using various rations, each underwent an intensive physical examination before and after the trials.

Each group went through five basic exercises, involving a daily march of 18 to 24 miles. When weather made bush tactics impossible, route marches of length requiring equal exertion

were substituted. Throughout trials, each man carried full battle order.

On a recording sheet carried, each man was required to note the order and amounts of food which he ate at each meal. Also noted was his general impression of the ration, his reasons for comments made, and any constructive suggestions. On the reverse side of this sheet, the medical officer noted water consumption during day and night, changes in weight, scores on rifle ranges, and his own observations. The officer in command of the group and the non-commissioned officer also were required to note their observations of each man's deportment, morale, and general performance.

At the end of each day's march, every man fired 10 rounds at a 30-yard target, in battle order. The officer fired 10 pistol rounds at 25 feet.

Taking of any food not contained in the diet as prescribed was prohibited strictly. Drinking water was taken by each man as measured. Water was brought by vehicle to men at lunch stop. One group subsisted on the standard Canadian Army and R.C.A.F. ration, another group on the newly arranged Canadian Mess Tin ration, and others on various compact rations. The latter included a special "Vitamin B Complex" deficient ration.

The Canadian Army Mess Tin Ration contains beef, pork and sardines in tins, biscuit, pasteurized cheese in wax-dipped cartons, jam and butter in tins, pea soup powder, tea, coffee, skim milk sugar mixture, chocolate, malted milk with skin milk and vitamins in packages, lump sugar, chocolate, hard candies, gum, salt, ascorbic

acid in tablet form, cigarettes and matches.

These items, constituting one day's ration, are enclosed in a sealed cardboard container. Each package is sprayed with wax to make it impervious to gas and moisture. To provide rations for 48 hours, two identical packages are carried in the soldier's haversack.

A proposed Canadian emergency ration was also tested at the field trials. This ration is carried by the soldier in the field at all times, and is intended for consumption only when no other food is available. It must be compact and at the same time contain a maximum number of calories.

One group was assigned to testing various items suitable for an emergency ration. Men in this party were required to march from five to seven miles for each of five days. From items tested, an emergency ration of biscuit and chocolate was chosen.

Is Always Useful

Nurse Vital Asset In Peace As Well As In War

The call to the country's armed forces is admittedly an attraction outweighing everything else. But whether she enlists in active service or stays actively engaged on the home front at present, the nurse is a vital and important asset to the country in war and peacetime alike. An attribute peculiar to her profession is the maintenance of her usefulness long after she ceases to be an active worker publicly in her vocation. In the nursing profession lies the key to individual and national health, and, consequently, the key to a normal, happy mode of life.—Regina Leader-Post.

CLOTHING FROM PLASTICS

Cheap clothing made from plastics, cheaper, better automobile tires and insulating sheathing for buildings, all made from a base of synthetic or natural rubber, were listed by Dr. Wacław Szulciewicz, refugee Polish chemist-inventor, as possible major factors in a sweeping post-war change in American economy.

Airplane Wing Development Made By Canadian Inventors Makes Modern Flights Possible

IN these days of world-grinding air journeys and stratospheric aerial fighting between swift-circling and darting planes few people realize that the wing development making such flight possible was perfected in a little Canadian village just 35 years ago. The "aileeron," or small wing flap which enables plane to bank and make quick turns in full flight, was the invention of "Aerial Experiment Association," a group formed by Dr. Alex. under Graham Bell at his Cape Breton Home, Beinn Breagh, near Baddeck, on October 1, 1907.

Dr. Bell was already well known to fame from his invention of the telephone. Born in Edinburgh, Scotland, in 1847, he came to Canada in 1870. His first trial of the distance talking system which was to revolutionize the communications of the world took place in Brantford, Ont., in 1876, and was patented the same year.

J. A. D. McCurdy, who made the first aviation flight in the British Empire at Baddeck in 1909 and was a member of the Aerial Experiment Association, now is an executive of the aircraft division of the department of munitions and supply. He and Henri Farman, great French pioneer of aviation, named the aerial wing development of 1907 the "aileeron."

Dr. Bell and his associates had invented it in the course of their experiments with a small powered "kite," when they discovered that, while they could make short flights of 100 feet or so they must have some form of lateral control.

They placed small movable sections on the edge of the wings which, when the craft tilted, would be automatically depressed or raised by the sway of the operator's body. The pilot was suspended in the structure in those days—and thus bring the plane back to an even keel.

Mr. McCurdy thus describes the introduction of this development to aviation generally: "It was around Sept. 1, 1908. The American Aero Club invited Henri Farman, premier flyer of Europe, to demonstrate to

the American public the machine which he had been successfully flying near Paris.

"His exhibition took place at a race course just outside of New York City. Farman took off and flew at an elevation of about five feet, flew for about 100 yards and landed. His mechanic turned the machine around by hand and flew back.

"I met him after he left the pilot's seat and asked him why he could not fly higher and make circles around the track, as we had been doing throughout the summer. He replied that it was impossible because the plane was broken. I had no French, so I had great difficulty explaining to him how we had overcome this by invention of the movable wing tips.

"It was only when I used the words 'little wings' that he exclaimed: 'ah, ailerons' and a smile spread over his whole face.

Newspaper men present were so interested in the discussion that they picked up that word and spread it in the papers next morning. The appellation has remained ever since."

Mr. McCurdy, tall, spare and now somewhat grizzled by youthful and keen, has given his life to the development of aviation and still contributes.

He remains one of the closest links with the life and experiments of Dr. Bell who, by chance of shipwreck while en route to England in 1908, was landed in Cape Breton, visited the Bras d'Or Lake region and determined to make his home on a hillside near Baddeck, naming it "Beinn Breagh," gaelic which may roughly be translated as "Beautiful Hill." There he built a substantial home and experimental laboratories. McCurdy, a native of Baddeck, went to the Bells from his engineering studies at McGill University.

Others about Dr. Bell were F. W. "Casey" Baldwin, another Canadian first who afterwards worked with the Wrights; Lord Thomas E. Selfridge, United States Army, who was soon to give his life in experiments with aircraft built by the association; and Glen H. Curtis, American motorcycle manufacturer who was to become a great figure in aviation.

Dr. Bell had developed the telephone and kindred appliances and was turning his mind to aviation. Mrs. Bell was his constant companion and aid and it was her money and inspiration that financed and originated the Aerial Experiment Association. It was at an after-dinner discussion in Beinn Breagh's spacious hall, under the light of oil lamps and before a roaring fire that the association was born on a chill fall evening 35 years ago.

Four machines were built and flown. The Silver Dart was flown from the use of Bras d'Or Lake. Feb. 23, 1909, for a distance of three quarters of a mile, the first heavier than air flight in the British Empire, with Casey Baldwin at the controls.

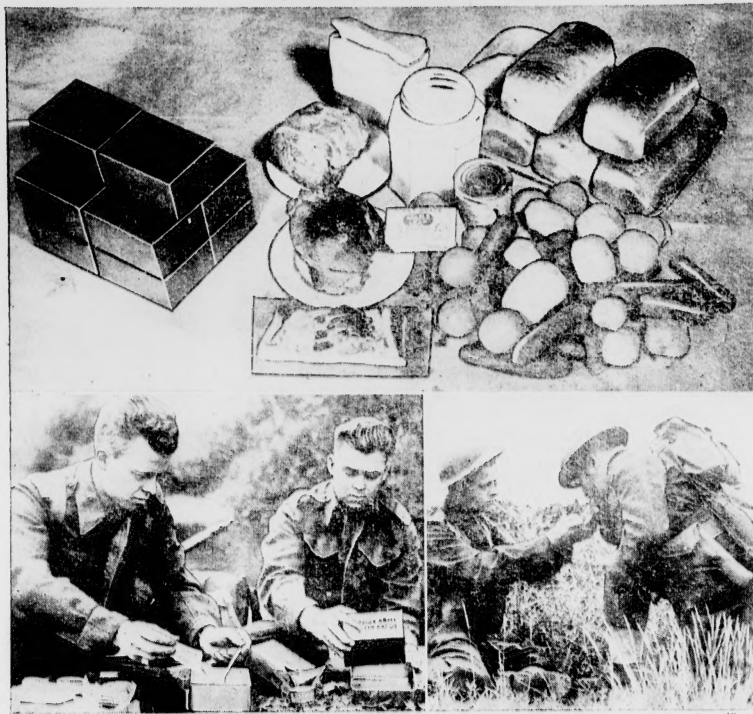

Mr. McCurdy likes to tell of those old days when he and his associates, under Dr. Bell's direction, attached themselves to great box kites and were thrown off Beinn Breagh's fifty promontories in their first efforts at flight. Those experiments were made in the winter time when not even the heaviest would cushion their fall.

Late in the summer of 1912 Mr. McCurdy made a solo pilgrimage to Beinn Breagh. He and a small group of Dr. Bell's relatives joined with the people of Baddeck and the surrounding country on a last climb to the peak of the mountain where Dr. Bell's body was laid in a grave blasted from the solid earth beneath his giant tetrahedral observation tower.

A few years later the ashes of Mrs. Bell were brought home to Beinn Breagh and laid beside the body of her husband.

2508

Army Rations In Compact Form

In a ten-day field test involving strain approximating that of actual combat, a group of fully trained men of active Canadian Army units maintained peak fighting efficiency without hunger or loss of weight when subsisting on the new Canadian Army Mess Tin Ration, as shown in compact cardboard cartons to the left in upper photo. They are wax-sprayed to make them impervious to gas and moisture. To try carrying a standard

ten-day army food ration, as shown right above, would add mobility of fighting men. In the lower left photo are shown two of the men having a meal during an interval following strenuous training. Even the amount of drinking water used was measured. In the lower left photo, two others, during the final minutes of the eating halt, are lighting up cigarettes which are provided in the Mess Tin Ration cartons.

The World of Wheat

by H. G. L. Strange

Vegetables will be Badly Needed

Many persons are becoming seriously alarmed about a probable shortage of vegetables. It is the intention of the Government of the United States and of Canada to dehydrate vast quantities of vegetables, and to ship them overseas to the members of the Armed Forces to Russia and to the people of Britain.

It is calculated that in consequence vegetables will be so short this coming summer that every person who can do so is being urged in the United States and Canada to grow more vegetables. Many farmers will no doubt wish to join in this most worthy effort.

With the present shortage of farm labour, keeping a large vegetable garden free from weeds will not be easy. When I was farming I hit upon a time-saving plan of sowing on a piece of summerfallow out in the fields in long single rows, leaving such a width between the rows so that any farm implement in ordinary use, a section of a harrow or a disc, could be dragged between the rows every day or so. In this way most of the weeds can be killed quickly by machine power. This only leaves the weeds between the vegetable plants in the rows to be pulled by hand.

ITEMS OF INTEREST IN THE WORLD OF FOODSTUFFS

The Argentine corn harvest is underway, with yields very light as a result of the long drought. "What acreage in the major exporting countries is expected to be reduced 3 to 4 percent this year—There is a severe border shortage in North Africa, as a result of the small wheat crop last year, and of German confiscation before the Allied occupation.

Spring ploughing and seeding in the U.K. is well underway and it is expected that wheat acreage will be increased to about 3,300,000 acres. The export subsidy on U.S. wheat to some South American countries has been increased to 30 cents per bushel—Canada has increased quotas on a number of essential farm machine supplies.

High Auction Prices Are Poor Business

Farmers bidding up the price of used farm machinery at auction sales and willing to pay a price higher than the price for the same machinery when new, would be better advised to make application for new equipment to the Wartime Prices and Trade Board, stated H. H. Bloom, administrator of farm machinery and municipal service equipment, in Edmonton recently.

Needs of farmers are given fair consideration, Mr. Bloom stated. Canadian quota adjustments were worked out in close collaboration with the Department of Agriculture agricultural authorities and the administrator.

"Farmers who feel that a refusal to their applications for new farm equipment is unsatisfactory have recourse to the Farm Equipment Appeal Board," Mr. Bloom stated.

No Extra Rations For Spring Harvesters.

No extra sugar, tea or coffee rations are provided for by the Ration Board for farmers finishing threshing operations this spring, officials of the Board announce.

During the harvest season last fall threshing gangs travelling from farm to farm were employed for several days at a time and the farmer's wife was permitted to obtain additional quantity of rationed commodities for harvesters' meal.

Due to the fact that for such harvesting still unfinished there are few transient workers employed this spring, this provision has been renewed.

Extra Sugar Will Sweeten Rhubarb.

Extra sugar for cooking rhubarb is allowed through order of the War-time Prices and Trade Board effective immediately, ration officials announced.

Blue coupon No. 1, "Spare B," in the new ration book may be used for the purchase of one pound of sugar from now until May 31. Only blue coupon 1 may be used for this purpose, and it is considered that one pound of sugar is sufficient for sweetening five pounds of rhubarb.

Heretofore no extra sugar was allowed for cooking rhubarb.

"It's for Bill"

... and when you buy a Victory Bond, to help Bill, and other boys on active service, you do something that will benefit you too. You save money. It's really a mistake to say that you "buy" a Victory Bond. You are not buying anything. You are saving money, and putting your savings where they will be absolutely safe, and where they earn money for you. (Each \$100.00 Victory Bond earns \$3.00 a year—3% interest.) You are likely producing more, and earning more. You can save more. You are not buying some things; you can't get them. You are buying less of many things—they're rationed. You can't help saving more. See to it that your savings are kept intact— earmarked for things you will need when the war ends. You will have to replace things that are worn out. You will want a lot of things. Money saved and invested in Victory Bonds will provide cash to pay for them.

WHAT IS A VICTORY BOND?

A VICTORY BOND is the promise of the Dominion of Canada to repay in cash the full face value of the Bond at the time stipulated, with half yearly interest at the rate of 3% per annum until maturity.

A Victory Bond is the safest investment in Canada. The entire resources of the Dominion stand behind it. Canada has been issuing bonds for 75 years, and has never failed to pay every dollar of principal and interest.

A Victory Bond is an asset more readily converted into cash than any other security.

You can buy Victory Bonds for cash in a lump sum, or you can arrange to pay for them in convenient instalments over a period of six months.

Your Victory Bond salesman will be glad to tell you full particulars.

Mountain View Notes

The March meeting of the W.I. was held at the home of Mrs. E. St. Clair, with only a small attendance present, owing to the bad roads. Mrs. Blain was elected president, the vacancy left by Mrs. Freda Fulkerth, who has moved to Calgary.

The April meeting will be held on Thursday, April 15th, at the home of Mrs. J. Worrall. Mrs. B. A. St. Clair will give a paper on "Education and Better Schools". The Victory Quilt will be finished at Mrs. Blain's before the next meeting.

Acknowledgements have been received from eight boys overseas, for cigarettes and from one of the Ditty Bags.

Correspondence

Editor,
 Didsbury Pioneer,

Dear Sir:
 Although the rivers have over-run the roads in many places, and water-runs everywhere, making many wash-outs, soft places and much mud, it has made it difficult for the motorist to travel. But, with a powerful car, a heavy set of chains and a good driver, one can manage to get through. Until! Yes, until he gets near Didsbury, where the roads are only the remains and ruin of neglect.

There's where the motorist would appreciate the kindness of "Road Closed" signs to warn him, so that he may reach some other town until firm reports are made of better roads, which may at least equal our rural roads.

A Rural Taxpayer.

Rugby Notes

With an attendance of ten members the W. I. meeting was held at the home of Mrs. Ed. Parker. Our home economics convener, Mrs. Alfred Cowitz, had some interesting articles on different phases of the afternoon's topic. The third lesson of the short course was taken up by Mrs. H. Hosegood, who finished it with a demonstration on the correct setting of a dinner table, etc.

Meeting then adjourned and lunch followed. Next month the meeting will be held at the home of Mrs. Bert Smith.

Rebecca Activities

On Wednesday, March 31, eleven ladies met at the home of Mrs. Boughman for the regular meeting of the Rebecca Red Cross Group. During the afternoon an extra large quilt was put together.

On Friday evening, April 9, there is to be a sale of articles made by the Junior and Senior groups. A pie social will finish the evening. This event is to be held in the school, and a cordial invitation is extended to everyone.

A delightful lunch was served by our hostesses, Mrs. Boughman, after a very busy afternoon.

The next meeting is to be held at the home of Mrs. Ira Scott, on Wednesday, April 14.

Meat Rationing Will Go Into Effect Early in May

Meat rationing for Canada, effective early in May on the basis of two pounds a person a week, was announced in the House of Commons recently by Finance Minister J. L. Halsey.

"Meatless days" will be observed by restaurants, hotels and other public eating places, after plans now being prepared by the prices board are completed.

MAIN DRIVING WHEELS

OF CANADA'S WAR EFFORT

HURRYING wheels, thundering wheels, wheels that have made it possible for Canada to grow in strength.

Today those wheels—the driving wheels of Canada's railways—are setting the pace for the war effort. They haul raw materials to humming war industries and rush away the finished tools of battle. They move food and fuel for the home front and the fighting front. They speed civilians on essential business, hasten troops to camps, embarkation points and on leave.

It's Canada's big war job. A job that only railway wheels can do. A job in which an army of 150,000

railway workers, men and women, is in the fight for Canada... shop crews and train crews, yard workers, section hands, telegraphers, signal men and office workers, a multitude of men and women in a multitude of jobs. They are making the giant wheels turn faster and faster.

From coast to coast in Canada, we—your railways—are rolling in the service of freedom, and our lines to and in the United States have linked the war efforts of two great sister nations.

The railway wheels are driving, in war as in peace, for Canada.

Trim Suit For A Tot

4281

By ANNE ADAMS

It's suit season for "small fry" too, as Anne Adams cleverly proves with Pattern 4281. Won't this outfit look captivating on your tot? It's so practical! The flaring skirt is firmly, comfortably kept in place by a bodice top. The fitted jacket has a jaunty "coco" cut and two smart high-riding pockets.

Pattern 4281 is available in children's sizes 2, 4, 6, 8 and 10. Size 6 takes 2 1/2 yards 35-inch.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. Because of the slowness of the mails delivery of our patterns may take a few days longer than usual.

"Well," said the insurance agent to the newly-wed Angus, "now that you've married I'm sure you'll want to insure your life."

"Aw, we wew," said Angus. "She's no that dangerous."

LIFE'S LIKE THAT

By Fred Neher

"So! I'm not changing a tire! . . . I just got out every four miles and jack it up to give it a rest!"

WORLD HAPPENINGS BRIEFLY TOLD

Yugoslavian troops killed 12,000 Germans and Italians in February, says a Tass despatch from Cairo.

The Dominion bureau of statistics reported that the commercial production of hay and pasture seeds in Canada in 1942 is currently estimated at 24,700,000 pounds.

The University of Manitoba has accepted a \$1,000 fellowship to commemorate the outstanding contribution to western agriculture of the late Dr. E. Cora Hind.

Brig. A. J. Ormiston, who was recently made Commander of the Bath for his work in the Middle East has been appointed director-general of medical services in South Africa.

Work has been started on translating the Encyclopedia Britannica into Chinese, it was announced. This "colossal undertaking" will require several years, the announcement said.

The Yugoslav government-in-London said the Germans have executed 1,250 Serb hostages in Belgrade alone in two recent massacres, apparently in fear of an Allied invasion of the Balkans.

The British government has in formed the British film business it must cut down on celluloid film by 25 per cent, and trade experts believe the best way will be by shorter hours in movie houses.

A newly-developed glass which permits glass welders to look through blinding glare and see welding operations from beginning to end is announced by Dr. E. D. Tillyer, research director of the American Optical Company.

PRINCESS WILL PRESIDE

One of the first public engagements of Princess Elizabeth will attend after her 17th birthday, April 21, will be to preside at the annual general meeting of the National Society for Prevention of Cruelty to Children. The meeting will be held in May.

DAIRY INDUSTRY HELPS

The Canadian dairy industry is helping the prisoners of war. Red Cross parcels sent to them contain about 20,000 pounds of cheese, 50,000 pounds of butter and 80,000 pounds of dry whole milk.

Another Job

Hon. Norman Hipel, who has been named second deputy to Premier Conant of the Ontario provincial government, Hon. T. B. McQuesten is first deputy.

Had Colorful Career

Commander Frank Worsley Died Recently At His Surrey Home

Commander Frank Worsley, D.S.O. (with Bar), who has just died in Claygate, Surrey, at the age of 70, was one of the most adventurous spirits of his time.

He is known to most people as the captain of the Endurance Shackleton's South Pole expeditionary ship. He went round the world in the Pathfinder in 1923, and made another expeditionary journey as sailing master and hydrographer in the Quest.

Tales of his daring would—and probably will—fill books. In 1924 he saved the crew of the Kathleen Annie, which he was then commanding when she was wrecked off the Orkneys.

When I met him in 1936 he was just off on a treasure hunt, in search of a pirate's haul, supposed to have been buried in the Cocos Islands over 300 years ago. Commander Worsley was the last of the "sleight-hand-husky" tradition of explorers—nowadays airplanes make it a different thing altogether.—London Daily Sketch.

Value Is Decreasing

Vichy Franc Now Worth Only One Sixths Of A Cent

The Vichy franc was worth about two of our cents in 1940. During 1941 its value dropped to two-thirds of a cent. Today, says the Brockville Recorder and Times, it is quoted on the French "black" dollar market at one-fifth or one-sixth of a cent. As the French printing-presses are working night and day to furnish additional currency it must soon become completely valueless. The Germans and Italians may think they're getting vast sums from France in occupation costs. Actually, however, in terms of real cash they are securing very little and must steadily receive less as France practices greater and greater inflation.

STOPPED GRUMBING

A wave of grumbling surged along a long line of waiting-book regulars at a Baltimore school. It grew stronger and then a teacher stopped work long enough to say: "A few hours' wait shouldn't be considered to great hardship. I came from a country where I stood in line fourteen hours for a loaf of bread and didn't get it." The grumbling died out.

Witchcraft means literally the craft of the wise, the word "witch" being allied to "wit" in the sense of knowledge.

Tubes Worth Saving

Fourteen Tons Of Tin Salvaged In Six Months

H. S. Rosenberg, deputy administrator of used goods for the price board, released statistics showing that in the past six months Canadians gave 14 tons of tin to the national war effort by returning used tooth paste, shaving cream and other collapsible metal tubes to salvage agencies.

More than 41 tons of tubes were collected and sent to 13 smelters in the half-year period ending March 1. From 250 toothpaste tubes came the tin required for one Blenheim bomber. With the equivalent of tin from one ointment tube required to line 20 soldiers' water bottles, it is estimated that the water canteens now being used by soldiers in Libya and Egypt absorbed a month's total salvage.

Telephone communication between New York and London was first established in 1927.

Salvage Ideas For Vivid Scatter Rugs

7410

by Alice Brooks

Get into the Victory scrap—with this clever salvage idea! Here are instructions for making nine rugs with scraps of material and yarn rescued from old knitted and unwoven articles. They're different in type and design—practical needcraft for your home. Instructions 7410 contain direct list of materials needed; pattern parts if needed.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number. Because of the slowness of the mails delivery of our patterns may take a few days longer than usual.

CHAPTER XII

MONSIEUR Andre Ribott, eight days out of Bir Mazul, was at peace with the world. The renegade, seated beside a glowing fire, had just finished his evening meal. Beside him sat Lt. Kohl and Annette Fournier. Behind the trio stood a soldier, the guard who had kept the French girl under surveillance ever since Ribott had delivered her into the hands of the Germans.

A moon shone over the plain on which the sheep were being reared for the night. A ledge of curving dunes, foreboding the southern horizon, and in a portion of the northern sky a patch of cloud was drifting toward the east. If that cloud increased, reflected Ribott, it could afford them an opportunity to slip unseen into the shadows of the relatively near by dunes. He laughed, knowing how faint that danger was. All the water of the caravan was on the trucks behind the barracked camels not a hundred yards to the left of Ribott, and it had been fear of the arid desert as much as the guns of the Germans that had forced the forerunners into submission.

Even now, out of the darkness, one

of the burrowed men was skirting the edge of the lunched sheep, returning to the campfire of his fellows where there was food and drink, when he could have chanced the insecurity of the unknown ghettos.

The Kahiri about the blaze shifted to allow the man in the burrow to squat on his haunches and dip into the bowl of coals. As the new comer ate, he counted the men circled about the fire. Eight, in addition to himself, enough for his purpose. The empty bowl was set aside; the man belched and shifted his kumya to gaze at the small cloud floating across the stars.

"Sheik Immeddin is among the dunes. The words were spoken barely four enough to be heard by the nearest Arab. "When that cloud touches the moon, the camel-riders of the Kahiri will sweep through the camp of the Germans."

There was a stir among the Bedouins, a stir that became a low murmur as all eyes turned to the speaker. That uplifted face outlined in the twilight had they not seen the blue-eyed man with the slightly crooked nose shot and left for dead at the Lonely Well?

The circle quieted and the man beside Jack Storey said, "What proof have you that our sheik lives?"

"If I have been from the dead, why not Immeddin?"

The Arab fingered his beard, then nodded. "That we seen the one fact makes the other possible. But you were the enemy of Immeddin. He would not let you live. We cannot believe you come from our leader."

"Of that, too, I have proof," smiled Storey, and from under his burrow came a hoarse pistol that was pressed into the hand of the surprised Berber. "Sheik Immeddin sends you this."

"OTHER weapons came from beneath the American's cloak. The guns passed around the dimming fire, vanishing under jerd and abas as Storey whispered the instructions of Immeddin."

The first to stroll away from the fire was Storey himself. The cloud was nearing the moon. He shuffled aimlessly toward the other camp fire. One of the shadowy figures about the blaze stood up. Storey's pulse quickened as he recognized Annette. There were two men seated on the ground and one of them grunted in German. A soldier in the background stepped beside the girl, wrapped a rope about her wrists, and then escorted her to the door of a tent several yards away.

Annette disappeared inside the tent and the soldier stationed himself squarely before the entrance. Lt. Kohl might keep a lax watch on the married Kahiri, but he was determined that Annette Fournier should not escape him.

passed in his enticed eating to shove away from his knee one of the marked stacks of the tentire, the action stirring the life in the lunch food moved. It lay tipped into the bowl again.

"Main Here," Kohl spoke to Ribott, "it seems to me that there are quite a few of those Arabs in the vicinity of those ammunition trucks. I saw three of them just now moving among the camels and baggage. Get over there and tell them to scatter. Those fellows are insured, but I have only one man guarding our stuff."

The renegade strode away, and then in the heavens the advancing cloud touched and swam across the surface of the moon. Storey set down his bowl and placed his hand, not under his cloak but on his knee close to the thick piece of wood he had thrust deeper into the fire.

Lt. Kohl passed, frowning. Into the silence came a drumming sound, faint but persistent. The frozen demand on the German's brow as the sound increased in volume. Suddenly, with a startled oath, Kohl left the tent in a great leap.

"A CHITING!" shouted the running officer. "We are attacked!"

A wild yell from the darkness gave him answer. "La-biala-ila Allah!" And spurring thence sent bullets hailing into the camp.

The guard before the tent gripped his rifle uncertainly. Storey closed his fingers on the butt of his rifle. He dropped the rifle and staggered, clanking at the sparks that blinded him. Longing forward, Storey caught the falling weapon by the barrel and crashed the heavy stock against the head of the reeling guard.

The guard dropped. Storey tore the flap of the tent and darted within. The dim glow of the fire enabled him to see the girl lying on the ground, and his arms swept up the huddled figure.

"It's Jack Storey, Annette," he spoke in her ear.

It seemed incredible that the camp could have reached the state of pandemonium in the few seconds that had elapsed since Storey had flung his rifle. Camels were plunging through the semi-darkness, shouting and gunfire mingled with the snarl and howl of camels and sheep.

With the girl in his arms, Storey raced toward the trucks, almost tripping over a scamping sheep. From

another direction came four soldiers, running for the grenades and guns that would check the furious rush of Immeddin.

A blast of lead met the soldiers as they neared the piled baggage behind which crouched the Kahiri. Storey had aimed. The Nazis fell back, but Storey did not slacken. His Arab dress had saved him from the bullets.

The American flung himself down behind a huddled domestic, and snatched his gun. Out on the sweeping plain the Germans were bringing order out of the confusion, seeking position where their discipline would outnumber the odds of mounts and numbers. But the battle line shifted before Kohl could get organized. The sheep frightened by the clamor and stamping of the animals, halted. The stampeding animals struck against the ranks of the German like a slaming tide, scattering the unmounted men. The domesticaries went with the woolen wave

and the remorseless Kahiri turned gun, knife and sword on their tumbling, demoralized foes.

IT WAS morning before the last Berber, hunting the fleeing Nazis through gully and dune, returned satisfied that their work was done. The command of Lt. Kohl had been obeyed, the lieutenant himself and Andre Ribott among the slain.

After the dawn prayers and breakfast, Immeddin the Lawless came to say good-bye to the Foreigner who had become his friend. "The Kahiri return to their hills. You, O Kohl, are still minded to travel toward Egypt?" Annette Fournier, in her dark farjahan was standing beside the American. "Mademoiselle," said Storey, "I shall be all right. Jacques. My work is still unfinished. I must take these sheep back to Algeria. They go for food to feed the hungry mouths for which they were intended."

"But, Annette—Capt. Lebeau will make you prisoner once more. Why don't you come with me?" he reached out to touch her hand. "I love you, Annette. Give up this dangerous life."

"No, Jacques." The girl shook her head. "I must return these sheep, and if I can get out of Algeria, I must still try to free France."

"I," said Immeddin the Lawless, "shall take the sheep back to Am Safa. Go with this man, Annette."

"Come with me, Annette," pleaded Storey. "Even in America your activities would be of use. There is a place in all the world, now, where men and women are not needed to work in the cause of liberty and freedom."

For a moment she looked into his eyes. Then, with a little nod and a little smile, she stepped closer to him. "Jacques."

Tayla, a smile showed the gaunt, bearded face of Immeddin the Lawless as Jack Storey gathered the girl in his arms. "It is good," he said. "The End."

Mother Nature clothes her animals in coats of heavy armor, fur, hair, hide, prickles, scales, skin spines and wool.

Builders' Hardware have one wood-burning Brander left.

Didsbury Jottings
By A.C.H.

The rumour that a submarine was sighted east of town here, is without foundation. So is the road.

"You tell me your dreams, and I'll tell you mine", goes the good old song. But, what Mrs. Harold Oke and Mrs. Lew Wigglesworth sang to each other, was "You sell me your house and I'll sell you mine". For that seems to be what they did.

How do you move out and in a house at the same time? I mean, wouldn't the Oke china get mixed up with the Wigglesworth cutlery, or something. I have it on good authority, however, that nothing so dreadful happened. The worst seems to be that one box of goods brought over by one lady, was carried carefully back to where it came from, by another lady, who couldn't tell just by looking at it whether it was coming or going. As all cardboard boxes look alike, it may be many weeks before the missing treasures are unearthed.

Going north to Olds is like going to the Arctic. While water is flowing freely from all the fields here, at Olds snow still lies thick on the roads, and snowdrifts line the roads. Coming back to Didsbury was almost like entering the tropics. Almost. I say.

A statistician is a man who draws a mathematically precise line from an unwarranted assumption to a forgone conclusion.

Guard Your Gasoline Ration Book

KEEP IT ON YOUR PERSON • DO NOT LEAVE IT IN YOUR CAR

NOW that you have a 1943-1944 gasoline ration book, it is up to you to keep it at all times in a safe place. If it is lost, burned, or stolen, you will be deprived of coupons which will not be replaced. In this regard, the policy of the Oil Controller is as follows:

- If, through negligence, you lose your gasoline ration book before October 1, 1943, you may be allowed no more, and perhaps less, than half the coupons to which you would be entitled if you were making an original application.
- If, through negligence, you lose your ration book on or after October 1, 1943, you may be allowed no more, and perhaps less, than 25 per cent of the coupons to which you would be entitled if you were making an original application.

The new gasoline rationing system, effective on April 1, will be strictly enforced. Under its provisions, the motorist, as well as the service station attendant, is held responsible if any infractions occur. It is contrary to the orders of the Oil Controller:

- 1 To purchase gasoline with 1942-1943 coupons.
- 2 To purchase gasoline unless you have the correct category sticker affixed to your windshield.
- 3 To detach coupons from your own book. (The removal of the coupons is the duty of the attendant.)
- 4 To have in your possession a gasoline ration coupon not attached to, and forming a part of, a gasoline ration book.
- 5 To have in your possession a gasoline ration book other than the book issued in respect of a vehicle you own, or in respect of a vehicle driven by you with the full consent of the real owner.
- 6 To alter, deface, obliterate, or mutilate any gasoline ration book or coupon.
